PROJECTS

Client Management and Billing System

September 2024- February 2025

- Developed a website and automated invoicing platform for an accounting consulting firm serving small and medium-sized businesses with support in English and French.
- Contributed to frontend and backend development, created and managed customer profiles, tracked hourly rate projects/services, generated and stored invoices in PDF format and sent automated email notifications allowing clients to view and download invoices.
- Technologies: Jira, Java, CI/CD, Spring Boot, MariaDB, TypeScript, React, GitHub, Figma, while following Agile methodology

Pet Clinic Project

September 2024- December 2024

- Extended the Spring Boot Microservices Pet Clinic application, a learning platform for managing pet clinic operations such as appointments, patient records, and veterinary services.
- Contributed to frontend and backend development, implemented microservices, practiced TDD, and managed CI pipelines while collaborating with peers in a Scrum-based environment.
- Technologies: TDD, CI/CD, Jira, Spring Boot, Docker, Java, React, Microservices architecture, Scrum, GitHub, MongoDB, while following Agile methodology

Virtual Art Gallery Exhibition Platform

September 2024- December 2024

- Developed a comprehensive web application simulating an immersive virtual art gallery, featuring an interactive floor plan, virtual exhibition rooms, detailed artwork pages, and a shopping cart with payment functionality for purchasing artworks.
- Implemented secure user authentication and differentiated access levels for buyers and artists to manage exhibitions, purchases, and auctions.
- Technologies: ASP.NET Core, C#, HTML, CSS, SQL Server, Azure, MVC

CERTIFICATES

SoftUni || Sofia, Bulgaria
